---

Before the computer starts to work, it needs to initialize its system setting (for example, loading the BIOS) and then turn on the computer. Features of Auto Poweron & Shutdown Power off in less than 20 seconds when the computer goes to sleep. Power on and immediately switch to your user desktop (without waiting for your login). Power off only when the CPU frequency is very low. Support NVIDIA Graphics Acceleration. Automatically check for new updates. Automatically turn on and off.

Automatically shutdown and restart at the set time. Automatically start the computer when you turn off your computer. Automatically restore a session that was closed by an application. Key Functions

1. Power Off/Off When you switch off your computer, you can control the function of the computer to return to a power-off state or to return to a completely off state.
2. Wake Up When you wake up your computer, it is immediately switched to your desktop, no wait time.
3. Interval Shutdown You can turn off the computer at a time. The computer will be shut down at that time.
4. Lock Computer You can lock the computer, but if the user wants to unlock it, it can be unlocked by a password or key in the Secure Mode.
5. Wake up at a certain time You can control the time to shut off and restart your computer.
6. Wake up at a certain time and restart your computer You can shutdown the computer at a certain time and restart it at that time.
7. Shut down and turn on You can shut down the computer at a certain time and then turn it on at that time.
8. Different shutdown mode You can choose one of three different shutdown modes. You can choose to shut down the computer, restart the computer or shut down and reboot at a certain time.
9. Auto-updater Auto Poweron & Shutdown can check for updates every week or every day. The latest update will be automatically downloaded.
10. Directory button You can switch the directory by clicking the 'New Folder' button.
11. Hard Disk Viewer You can view the directory of the hard disk.
12. Hibernation Manager You can check the Hibernation Settings in the Management section.
13. Suspend Mode You can check the Susp 82157476af
